

WOODHEAD SHOCK ABSORBERS

With familiar brands no longer manufacturing aftermarket Shock Absorbers, Jaguar owners were left with no choice but to fit expensive OE or uprated Shock Absorbers to their vehicles, which at times were in short supply.

The latest line from Woodhead hopes to fill that gap in the market. A great deal of time and effort has gone into this range, being engineered with a modern twin tube design and tested in a number of different road conditions, to ensure high quality and not just the cheapest product on the market.
