SAFETY DATA SHEET

Cataclean Cleaning Agent for catalytic converters

Page: 2 rters Printed: 12/19/2013 Revision: 1/3/2017 Supersedes Revision: 08/31/2004

GHS Precaution Phrases

P233: Keep container tightly closed.

P210: Keep away from {heat/sparks/open flames/hot surfaces}. - No smoking.

P280: Wear {protective gloves/protective clothing/eye protection/face protection}.

P240: Ground/bond container and receiving equipment.

P241: Use explosion-proof electrical/ventilating/lighting/ $\{.../\}$ equipment.

P243: Take precautionary measures against static discharge.

P242: Use only non-sparking tools.

P271: Use only outdoors or in a well-ventilated area.

P261: Avoid breathing {dust/fume/gas/mist/vapours/spray}.

P264: Wash {hands} thoroughly after handling.

P362+364: Take off contaminated clothing and wash it before reuse.

GHS Response Phrases

P370+378: In case of fire, use $\{...\}$ to extinguish.

P303+361+353: IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower.

P304+340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P312: Call a {POISON CENTER/doctor/...} if you feel unwell.

P302+352: IF ON SKIN: Wash with plenty of soap and water.

P322: Specific measures {see ... on this label}.

P363: Wash contaminated clothing before reuse.

P321: Specific treatment {see ... on this label}.

P332+313: If skin irritation occurs, get medical advice/attention.

P362: Take off contaminated clothing.

P305+351+338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310: Immediately call a {POISON CENTER/doctor/...}.

P309+311: Call a POISON CENTER or doctor/physician if exposed or you feel unwell.

P301+310: IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician.

P331: Do NOT induce vomiting.

GHS Storage and Disposal Phrases

P403+235: Store in cool/well-ventilated place.

P501: Dispose of contents/container to {...}.

P405: Store locked up.

P403+233: Store container tightly closed in well-ventilated place - if product is as volatile as to generate hazardous atmosphere.

Potential Health Effects (Acute and Chronic)

EYES: May cause mild irritation.

SKIN: Can cause skin irritation. Prolonged or repeated contact may dry the skin.

SWALLOWING: Swallowing small amounts of this material during normal handling is not likely to cause harmful effects. Swallowing large amounts (1/8 of a cup or more), may be harmful. This material can get into the lungs during swallowing or vomiting. This results in lung injury and chemical pneumonia, including possible death.

INHALATION: breathing of vapor or mist is possible. Breathing small amounts of this material during normal handling is not likely to cause harmful effects. Breathing large amounts and repeated exposure over time may be harmful. Symptoms usually occur at air concentrations higher than the recommended exposure limits.

TARGET ORGAN EFFECTS: Over exposure to this material (or its components) has been suggested as a cause of the following effects in laboratory animals: testis damage, kidney damage, liver damage, and effects on hearing. Overexposure to this material (or its components) has been suggested as a cause of the following effects in humans: Central Nervous System effects.

DEVELOPMENTAL INFORMATION: This material, or a component, may be harmful to the human fetus based on positive test results with laboratory animals.

LD 50 / LC 50

Causes eye irritation.

Medical Conditions Generally Aggravated By Exposure

Skin, lungs (for example, asthma-like conditions), liver, kidney, central nervous system, male reproductive system, and auditory system. Individuals with preexisting heart disorders may be more susceptible to arrhythmias (irregular heartbeats) if exposed to high concentrations of this material.

3. Composition/Information on Ingredients			
CAS #	Concentration		
64742-47-8	5.0 -10.0 %		
1330-20-7	30.0 -60.0 %		
71-23-8	10.0 -30.0 %		
67-64-1	10.0 -30.0 %		
	CAS # 64742-47-8 1330-20-7 71-23-8		

4. First Aid Measures

Emergency and First Aid Procedures

Take proper precautions to ensure your own health and safety before attempting rescue or providing first aid.

EYES: Check for and remove contact lenses.

If irritation or redness develops, flush eyes with cool, clean, low pressure water for at least 15 minutes. Hold eyelids apart to ensure complete irrigation of the eye and eyelid tissue.

Do not use eye ointment.

Seek medical attention immdiately.

SKIN: Remove contaminated shoes and clothing. Flush exposed areas with large amounts of water. If skin is damaged, apply a clean dressing and seek immediate medical attention. do not use ointments. If skin is not visibly damaged (blistering, redness), clean the affected area thoroughly with mild soap and water. Seek medical attention if tissue appears damaged or if pain or irritation persists.

SWALLOWING: Do not induce vomiting. If spontaneous vomiting is about to occur, place victim's head below knees.

If victim is drowsy or unconscious, place on left side with head down.

Never give anything by mouth to a person who is not fully conscious.

Do not leave victim unattended.

Seek medical attention immediately.

INHALATION: Immediately move victim to fresh air.

If victim is not breathing, immediately begin CPR.

If breathing is difficult, 100% humidified oxygen should be administered by a qualified individual. Seek medical attention immediately.

In Case of Inhalation

Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Get immediate medical attention.

In Case of Skin Contact

Rinse cautiously with water for several minutes.

In Case of Eye Contact

Flush eye with water for 15 minutes. Get medical attention.

In Case of Ingestion

IF SWALLOWED: Do not induce vomiting. Give milk or water. Get immediate medical attention. Carefull evacuation of stomach by medical personnel imperative.

Note to Physician

Inhalation overexposure can produce toxic effects. Monitor for respiratory distress. If cough or breathing difficulty develops, evaluate for upper respiratory inflammation, bronchitis, and pneumonitis. Administer supplemental oxygen with assisted ventilation, as required.

This material sensitizes the heart to the effects of sympathomimetic amines. Epinephrine and other Sympatomimetic drugs may initiate cardiac arrhythmias in persons exposed to this material. Administration of sympathomimetic drugs should be avoided.

INGESTION: This material is an aspiration hazard. Potential danger from aspiration must be weighed against possible oral toxicity when deciding whether to induce vomiting. Also, signs of chemical pneumonia may be delayed up to 48 hours, presenting only after moderate physical exertion. Induction of emesis is not recommended. Consider activiated charcoal and/ or gastric lavage. If patient is outbound, protect the airway by cuffed endotracheal intubation or by placement of the body in a Trendenlenburg and left latertal decubitus position.

Signs and Symptoms Of Exposure

EYES: stinging, tearing, redness and blurred vision.

SKIN: redness, burning, drying and cracking of skin, chemical burns, blistering, and other skin damage.

Signs and symptoms of exposure through skin absorption, swallowing, or inhalation may include: redness of the face and neck, mouth and throat irritation, (soreness, dry or scratchy feeling, cough), stomach or intestinal upset (nausea, vomiting, diarrhea), irritation of the nose, throat, and airways, tight feeling in the chest, central nervous system excitation (giddiness, liveliness, light headed feeling), followed by central nervous system depression (dizziness, drowsiness, weakness, fatigue, nausea, headache, unconsciousness) and other central nervous system effects; effects on memory; respiratory depression (slowing of breathing rate); shortness of breath, loss of coordination, confusion, irregular hearbeat, narcosis (dazed or sluggish feeling), coma.

	5. Fire Fighting Measures		
Flammability Classification:	Flammable Liquid		
Flash Pt:	80.00 F (26.7 C) Method Used: TAG Closed Cup		
Explosive Limits:	LEL: 1.0 UEL: 6.6		
Autoignition Pt:	980.00 F (526.7 C)		
Fire Fighting Instructions			
Wear a SCBA with a full facepiece operated in positive pressure demand mode with appropriate turn out gear and			
chemical resistant personal pro-	tective equipment. Refer to the PPE section (#8) of this MSDS.		
Flammable Properties and Hazards			
VAPORS ARE HEAVIER THAN AIR AND MAY TRAVEL ALONG THE GROUND OR MAY BE MOVED			
BY VENTILATION AND IGN	NITED BY PILOT LIGHTS, OTHER FLAMES, SPARKS, HEATERS,		
SMOKING, ELECTRIC MOT	ORS, STATIC DISCHARGE, OR OTHER IGNITION SOURCES AT		

Licensed to FAS-PAK, INC .: MIRS MSDS, (c) A V Systems, Inc.

LOCATIONS DISTANT FROM THE MATERIAL HANDLING POINT.

NEVER USE WELDING OR CUTTING TORCH ON OR NEAR DRUM (EVEN EMPTY) BECAUSE PRODUCT, VAPORS, OR RESIDUE CAN IGNITE EXPLOSIVELY.

Hazardous Combustion Products

Carbon dioxide, carbon monoxide, and various hydrocarbons.

Suitable Extinguishing Media

Regular foam, carbon dioxide, or dry chemical.

Unsuitable Extinguishing Media

No data available.

6. Accidental Release Measures

Steps To Be Taken In Case Material Is Released Or Spilled

SMALL SPILL: Absorb liquid with vermiculite, Oil-Dri, or sand.

LARGE SPILL: Eliminate all ignition sources (flares, flames, pilot lights, electrical sparks).

Persons not wearing respirators and other required protective equipment should be excluded from the area of spill until clean up has been completed.

Turn off all valves and pumps to stop spill at source.

Prevent from entering drains, sewers, streams, or other bodies of water. Prevent from spreading by diking or berming.

If runoff occurs, notify the EHS Manager immediately.

Pump or vacuum transfer (make sure grounded!) spilled product to clean, labelled containers for recovery. Absorb unrecoverable product with inert material such as Oil-dri. Tranfer contaminated absorbent and other materials to SPILLS OF 100 LBS. (or 725 Gallons) OR MORE MUST BE REPORTED TO LOCAL, STATE, AND FEDERAL AGENCIES UNDER CERCLA.

7. Handling and Storage

Hazard Label Information:

Do not reuse this container. Do not get on skin and clothing. Keep away from heat and flame. Keep away from sources of ignition.

Precautions To Be Taken in Handling

Containers of this material may be hazardous when emptied. Since emptied containers retain product residue (vapor/liquid/ and/or solid), all hazard precautions given in the data sheet must be observed.

All 5-gallon pails and larger metal containers, including tank cars and tank trucks, should be grounded and/ or bonded when material is transferred. Hydrocarbon solvents are non-conductors of electricity and as such can become electrostatically charged during mixing, filtering, or pumping at high flow rates. If this charge reaches a sufficiently high level, sparks can form that may ignite the vapors of flammable liquids.

WARNING: Sudden release of hot organic chemical vapors or mists from process equipment operating at elevated temperature and/ or pressure, or sudden ingress of air into vacuum equipment, may result in ignitions witouht the presence of obvious ignition sources. Published "Autoignition" temperature values cannot be treated as safe operating temperatures in chemical processes without analysis of the actual process conditions. Any use of this product in elevated temperature processes should be thoroughly evaluated to establish and maintain safe operating conditons.

Precautions To Be Taken in Storing

Keep away from oxidizers, heat and flames. May attack some plastics, rubber and coating. Keep in tightly closed containers in a cool, dry, ventilated storage area. Ground container and transfer equipment to eliminate static sparks. This product should be stored away from any incompatible materials (see Section 10).

SAFETY DATA SHEET

Cataclean Cleaning Agent for catalytic converters

Packing Group:	III
LAND TRANSPORT (Canadian TD	G)
TDG Shipping Name	Flammable liquids, n.o.s.
LAND TRANSPORT (European AD	iR/RID)
ADR/RID Shipping Name	Flammable liquids, n.o.s.
AIR TRANSPORT (ICAO/IATA)	
ICAO/IATA Shipping Name	Flammable liquids, n.o.s.
UN Number:	1993
Hazard Class:	3 - FLAMMABLE LIQUID
Packing Group:	III
MARINE TRANSPORT (IMDG/IMO))
IMDG/IMO Shipping Name	Flammable liquids, n.o.s.
UN Number:	1993
Hazard Class:	3 - FLAMMABLE LIQUID
Packing Group:	III
Marine Pollutant:	Yes

Additional Transport Information

THE TRANSPORT INFORMATION MAY VARY WITH THE CONTAINER AND MODE OF SHIPMENT.
