Remove and destroy Bulletin X-37NAS, amended 05/05.
Replace with this Bulletin.
The X-TYPE link lead chart has been revised.

Issue:

This bulletin covers the following vehicles;

- **XJ** 2004 MY and up

- **XK** 2003 MY and up

- **S-TYPE** 2003 MY and up from VIN M89854

- **X-TYPE** 2003 MY and up from VIN D31148 –
  (EXCEPT those in the range: E37149 – E46479. These vehicles will not be able to have a phone system installed. The phone/voice pre-wire was deleted)

<u>INSTALLATION TIME</u>
Installation time for a new system is 2.0 hrs.

Several resources are available to you for support:

- **Website - www.jagdigitalphones.com -** username: jagphones and the password: digital

  This website is for dealer use only. The website was designed to help understand the different phone programs and help select the proper carrier for each customer based on their zip code, plus much more.

- **Technical Bulletins** can be found on Global Technical Reference (GTR) *https://hub.franchise.jaguar.com* or internet: *http://www.jaguartechinfo.com*

- **Parts Bulletins** can be found at *https://web.jagtech.dealerconnection.com*

- **Fitting Instructions –** Will no longer be printed. **Go to GTR web site/ view owner information/ select accessory fitting instructions**

- **Motorola Hotline:** 1-877-MOT-SUPPORT – The Motorola hotline is for handset questions.

- **Jaguar Technical Hotline** at 1-888-JAGDLRS – The Jaguar hotline is for technical support of the phone system in the vehicle.

This bulletin includes dedicated vehicle lists showing all parts needed to install the Bluetooth system as a new installation (page 2) and as a conversion from V60 to Bluetooth (page 5).

Phones listed in this bulletin are those supported by the accessory Bluetooth installation only, not the factory installed Bluetooth system.

Bluetooth Validated Handsets

All Bluetooth phones with Hands Free Profile version 1.0 or later will be supported by this system. However, the full functionality can only be guaranteed for these mobile phones, which are listed. This list will be up-dated as new phones are tested for compatibility.

While Bluetooth (BT) technology is a "global standard" there are many different Bluetooth profiles. Not all manufacturers choose the same profiles for use in their devices. It is possible for a customer to have a BT phone without a compatible profile that allows the phone to operate with a Jaguar vehicle. Jaguar Bluetooth system uses **HFP1.0** (Hands free Profile). However, the software that is delivered in the mobile phone, that also uses HFP1.0, may have had errors introduced by new software releases and as such cannot be guaranteed by Jaguar to work with the vehicle system.

The mobile phones and the software levels given have been validated and approved for functionality with the Jaguar Bluetooth system. Newer or revised software versions in any mobile phone may not be compatible with the system. Jaguar does not guarantee availability or functionality with each wireless carrier or mobile phone.

Notes

- Phone handset software (SW) shown on these pages relates to the level of SW tested and approved for use. Typically, this is a minimum level, but later releases cannot be controlled and as such, cannot be guaranteed to work. Later SW known to be incompatible will be indicated accordingly.

- To find the SW version on a **Nokia** handset: At the main screen, use the keypad to enter ***#0000#.** The version (V) will be displayed.

- To find the SW version on a **Sony Ericsson** handset: At the main screen use the joystick and keypad enter
  Ø * < < * < * (where < or > refers to the direction of movement of the joystick) then select **Service info** then **SW information**.

- To find the SW version on a **Siemens** handset: At the main screen, press ***#06#** then **Info**.

- To find the SW version on a **Motorola** handset: On the main screen, use the keypad to navigate to **menu/settings/phone status/other info/ SW Version / Flex Version**

To select correct telematics link lead from matrix below please read the following;

1) Establish the final specification of the vehicle once upgraded (including existing features) and locate the corresponding column indicated by 'X's in the D2B OPTION CHART.

2) Follow the column down to the USE LINK LEADS chart. Read off the corresponding link lead part numbers from chart as denoted by 'X's.

NB - Please note that depending on the options required 1 or 2 link leads will be required. Link leads must only be used as specified, no other combination is acceptable.

(Row group label: Vehicle specification post retrofit)

▨ = FACTORY FIT OPTION ONLY   ☐ = DLR INSTALLED ACCESSORIES

Example: Link lead required for vehicle with existing CD, upgrading vehicle to include telephone.
Final vehicle specification = CD and Telephone, Therefore Telematics link part number required will be 14148

X-TYPE (From VIN D31148) D2B LINK LEAD MATRIX

To select correct Telematics link lead from the matrix below please read the following;

    1) Select the final specification of vehicle once upgraded (including existing features)

    2) Select link lead part number from the matrix below for final specification of vehicle.

    Please note only 1 link lead is required for any upgrade.

Final Vehicle specification post upgrade
