Brief notes and technical information tips about Jaguar products

Models: All Jaguar Models

Information: Service Actions and Recalls

When checking a car for open campaigns on DDW, a service action or recall may appear that is not listed on the Service Support site. Campaigns are based on worldwide VINs and may not have been released in the North American market. If there is not a reference bulletin, the campaign has not been released or is not applicable for our market.

Models: S-TYPE V8 2003 MY onwards, XK 2003 MY onwards, XJ 2004 MY onwards

Information: ZF transmission adaptations

ZF 6HP26 transmission adaptations can now be cleared with WDS as of version 30. Use option under Special Applications, clear adaptations, and then perform adaptation drive cycle **at least** 5 times. If the shift quality of the transmission does not improve, contact the ZF representative on the Technical HelpLine. At this time V-6 S-TYPE modules **do not** have the adaptation clear function and must be cleared with a GDS510 available from your FSE or the HelpLine.

Models: S-TYPE 2003 MY Onwards, XJ 2004 MY onwards

Information: Accessory installation of phone and voice activation

When installing **phone and voice** into a car, you **must first enable/configure** the **voice** in **Add/Remove Accessories** using WDS. If the phone was installed and configured first, remove the option using **Add/Remove Accessories**, perform a hard reset leaving battery disconnected for 30 minutes, then add the options in the correct order. Failure to follow the correct procedure **will** cause the D2B network to crash.

Models: S-TYPE 2003 MY onwards

Symptom: Crank/no-start and fuse #47 in Rear Power Distribution Fuse Box open

Information: Fuse #47 is not listed in the Power Distribution section of the Electrical Guide and may be open causing a crank/no-start condition. The fuse protects the fuel pump circuit **after** the fuel pump relay but before the REM. Fuse location is listed on Part 2 of the respective engine management electrical diagrams. Note: For locating connector, fuse, splice, etc. locations quickly, use the online or CD based electrical guides. After selecting the appropriate vehicle model and year, select the **find** (binocular icon) tab on Adobe Acrobat and type text to search.

Models: XJ

Symptom: Service Action S491

Information: This service action is for select retailers, is a survey only, and does not involve repairs. If a DDW report shows it open, ignore it if you are not a selected retailer. Don't know if you are a selected retailer? Ask your service manager.
