ISSUE:

This bulletin gives you the information required to install the current Jaguar/Motorola Timeport phone in the new X-TYPE. The basic phone kits for the carriers are the same as the other models with the addition of the Cingular system, consisting of four new kits to cover the majority of the Cingular coverage area. (Does not cover Cingular GSM Systems)

These Cingular kits are also for all 2001 MY XJ/XK/S-TYPE models and the 2002 MY S-TYPE. These Cingular kits can also be retrofitted to earlier MY cars as shown in the X-10 Parts Bulletin re-issued in March 2001.

To determine which Cingular phone kit is required you must go into the Jaguar/Motorola website and put in the zip code where the owner will be driving.

Website: WWW.jagdigitalphones.com**User Name: jagphones****Password: digital****X-TYPE DIFFERENCES VERSUS CURRENT CAR MODELS**

- The fitting kit now contains the PSE box and there is no completer kit as in the other models.
- Every installation will require a link lead which will vary by the options and/or accessories fitted to the car. Please ensure you know which of the following the car has before choosing the link lead - CD player, phone, navigation, voice activation.
- Voice activation will not be able to be installed until November car deliveries to your dealership.
- Antenna is a patch type, which is mounted in the rear bumper. On cars with the optional JaguarNet (formerly Assist) package, which includes a cellular phone, the antenna is on the rear windscreen. (Availability also in November) There is no optional Deluxe Communications package as per the S-TYPE.
- JaguarNet will use Sprint PCS phones as per the S-TYPE.
- The In-Car Phone Operating Guide will be in the Literature pack after VIN C10168. Vehicles prior to this VIN must have part number JJM 183120/17 added to the Literature pack.
- There is no phone factory fit option.
- Phone can be operated through the steering wheel controls, the radio head or by the touch screen on navigation equipped cars.

KIT CONTENTS – ALL

Only the phone handset changes from one kit to another. All other components remain the same.
