### NOTE

Parts content does not include assembly, distribution, or other non-parts costs.

### FOR THIS VEHICLE

- Final assembly point: COVENTRY, ENGLAND
- Country of origin:
- Engine Parts: ENGLAND
- Transmission parts: GERMANY

### BUMPER QUALITY LABEL

This vehicle is equipped with front bumper that has been tested at an impact speed of 2.5 mph per hour, and a rear bumper that has been tested at an impact speed of 2.5 mph per hour and has met the no damage to vehicle's body and minimal damage to the bumper and attached hardware. Minimal damage to bumper to parts damage that can be repaired with the use of conventional repair materials without replacing parts. The damage to the bumper (to the bumper body) may require a repair at a low speed collision. For context, the speed is 60% of that of a full size car.

### IMPORTANT NOTICE

These impact tests are good indicators of the speed at which the described extent of bumper damage will not be exceeded by a reasonable engineering judgment and do not imply protection to the bumper and attached parts from damage to the vehicle body or safety system in 2.5 mph impacts, but sets no limits on damage to bumper and their associated components and hardware. This vehicle meets the federal bumper standard of 2.5 mph front and rear, and 1.5 mph for the bumper corner.
