

Jaguar XK8/XKR – Adjustable Footrest

Footrest Adjustment

Footrest and Height Extension

The footrest provided for the driver's left foot is attached to the floor by two bolts. The upper part is a height extension, which if not required can be removed, after first releasing the front clip. When the extension is detached the two bolt hole plugs may remain on the extension. These plugs must be removed and refitted into the bolt holes.

Low-Level Footrest

A low-level, one-piece footrest is available which replaces the standard two-piece fitment. The low-level footrest is available from your Jaguar Dealer.
